EDUCATION

PhD	North Carolina State University, Statistics Advisor: Brian Reich Cumulative GPA: 4.0	2022-present
MR	North Carolina State University, Statistics Cumulative GPA: 4.0	Dec 2022

RESEARCH INTERESTS

Bayesian inference and hierarchical modeling, spatial and spatiotemporal statistics, tensor decomposition, tensor regression, surrogate modeling, active learning, sequential design, climate and environmental applications, causal inference, probabilistic machine learning

CURRENT RESEARCH PROJECTS

With Brian Reich and Yawen Guan, “A Multivariate Spectral Model with Adjustment for Unmeasured Confounders”: To find causal effects, we propose a spectral method that uses Bayesian hierarchical models to adjust for spatial confounding. We use tensor coefficients to allow for them to vary by frequency and shrinkage prior for variable selection. We intend to analyze the effects of environmental and socioeconomic factors on health outcomes.

With Kevin Quinlan and Annie Booth. “Active Learning with Deep Gaussian Processes for Aero Database Construction”: We explore whether deep Gaussian Processes (GP) perform better than ordinary GP as surrogate models for aerodynamic data. We also devise new algorithms for active learning to more efficiently construct aero databases.
