RESEARCH EXPERIENCE

Environmental Protection Agency, Research Triangle Park, NC — August 2024 to present
Oak Ridge Institute for Science and Education (ORISE) Fellow

- Mentors: Ana Rappold and Brian Reich
- Research project: A Multivariate Spectral Model with Adjustment for Unmeasured Confounders for Multiple Outcomes and Multiple Exposures
- Proposed a spectral, fully Bayesian model to adjust for spatial confounding and ensure causal interpretation of effects
- Constructed fully Bayesian MCMC algorithms in R with different priors and capacity (multivariate vs univariate outcomes) to compare model performance
- Paper uploaded to arXiv and under review at Journal of the American Statistical Association

Collaborator of Lawrence Livermore National Laboratory — August 2024 to present

- Advisors: Kevin Quinlan and Annie Booth
- Research project: Actively Learning Joint Contours of Multiple Computer Experiments
- Examined predictive accuracy of Deep Gaussian Processes versus ordinary Gaussian Processes as surrogate models for aerodynamic data
- Currently completing manuscript

Lawrence Livermore National Laboratory, Livermore, CA — May to August 2024
Data Science Summer Institute Intern

- Conducted literature review on surrogate modeling, contour estimation, and active learning
- Presented at end-of-summer presentation for interns
