RESEARCH EXPERIENCE

Environmental Protection Agency , Research Triangle Park, NC Oak Ridge Institute for Science and Education (ORISE) Fellow • Advisors: Ana Rappold and Brian Reich • Research project: A Multivariate Spectral Model with Adjustment for Unmeasured Confounders for Multiple Outcomes and Multiple Exposures • Proposed a spectral, fully Bayesian model to adjust for spatial confounding and ensure causal interpretation of effects • Constructed fully Bayesian MCMC algorithms in R with different priors and capacity (multivariate vs univariate outcomes) to compare model performance • Used tensor structure so that coefficients can vary by spatial scales, exposures, and outcomes • Implemented canonical polyadic tensor decomposition to reduce dimension • Performed extensive simulation studies • Visualized Geographic Information System data using R (sf, tidyverse, and ggplot2) • Paper uploaded to arXiv and under review at Journal of the American Statistical Association	August 2024 to present
